DETAILED ACTION

Election/Restriction

1. Claims 1-4 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b) as being drawn to a non-elected invention. Election was made **without** traverse in Paper No. 9 and affirmed in Paper No. 14.

Claim Objections

2. Claims 27-30 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from a cancelled claim (namely claims 6 and 7). See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 112

3. Claims 5, 8-26, and 31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation “from the group consisting of an icon and a symbol” (claim 5, lines 4-5) is indefinite. The language amounts to an improper Markush group, one which does not specify the particular species of the replica. It is suggested that the claim be amended to properly recite the

Art Unit: 3721

elements of the group or the language be deleted from the claim so that applicant might more particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The new recitation "so as not to suggest the article" (claim 5, lines 6-7) is considered vague and indefinite because it is unclear what kind or type of shape, if any, would or would not suggest the article. In general applicant's use of the term "suggest" (claim 5, lines 8 and 16) fails to positively recite any relevant structure or function of the claimed article and thereby render the claims vague and indefinite. This is also the case in claim 5, lines 8 and 16; claim 24, line 8; claim 25, lines 3, 7, 9, 11; claim 26, lines 3-4, 7, 9, 11.

The new recitation "an activity in which the article can be used" (claim 5, line 8) is vague and indefinite because it is unclear which activity the article can be used with. Further, it has been held that the recitation that an element "can" perform a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. *In re Hutchison*, 69 USPQ 138.

Lines 12-13 of claim 5 are unclear because it is not understood where the beginning of the bracket to delete the words by the amendment is intended to be. The end bracket is located after the word "shape" (claim 5, line 13).

It is vague as to what applicant intends to claim by the recitation "marketing the article with the package..." (claim 5, line 15) because no marketing steps have been recited. Note that all products are "marketed".

Art Unit: 3721

The recitation “a shape that is suggestive of an activity” (claim 5, line 8) is vague and indefinite. It is uncertain as to which shape is suggestive and which is not.

The recitation “the step of constructing the replica to have additional utility includes...” (claim 22, lines 1-2) lacks proper antecedent basis.

The recitation “constructing the replica to be capable of...” (claim 22, line 3) is vague and indefinite because it has been held that the recitation that an element “capable of” performing a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. *In re Hutchison*, 69 USPQ 138.

Claim 22 is vague and indefinite for failing to point out what “constructing ...to be capable of receiving...writing”. It is uncertain as to exactly which surface can receive writing and which cannot.

The recitation “from the group including a wiping cloth, a rain coat...” (claim 24, lines 4-5) is indefinite. The language amounts to an improper Markush group, one which does not specify the particular species of the object. It is suggested that the claim be amended to properly recite the elements of the group or the language be deleted from the claim so that applicant might more particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is noted that the aforementioned are merely examples to make the applicant aware that in general the claims of record are replete with vague and indefinite limitations and no coherent method can be pieced together with which to make a rejection. It is suggested that applicant

Art Unit: 3721

thoroughly review all limitations within the claims and re-write them to positively set forth all method steps as well as functional and structural limitations.

Claim Rejections

4 Since there is a great deal of uncertainty and confusion as to the exact limitations recited in claims 5 and 8-31 , no art rejection has been applied thereto. See MPEP 2173.06.

Response to Arguments

5 Applicant's arguments filed 08/06/99 have been fully considered but they are not persuasive.

With regard to applicant's comments on pages 6 and 7 that the Office Action is not clear as to how the claims are being interpreted and to the arguments in regard to the references Gelinas, Agapiou, Danforth, Gilstrap and Swatek all art rejections have been withdrawn. The claims of record are solely rejected under 112, 2nd paragraph (as indicated above) because no clear understanding of what applicant intends to claim can be drawn. Additionally, the indication of Allowability of claims 6 and 7 (Paper #9) is withdrawn as the new claims 25-31 present a great deal of uncertainty and confusion as pointed out in the 112, 2nd paragraph rejections above.
